PROFESSIONAL SUMMARY

Information Systems student at Universitas Bina Nusantara, currently in semester 5, with experience in academic system-analysis and digital-platform projects, alongside accounting and finance operations. Designed systems for billiard reservations and management, smart workspace and cafe rentals, and ERP operations for a phone-case and accessories business; the billiard system's automated billing timer reduced potential duration disputes to 0%. Focused on developing reliable information systems and digital services through process analysis, system design, and cross-functional collaboration.

WORK EXPERIENCE

Accounting and Institutional Finance

Jan 2023 – Jun 2023

PT. Surya Artha Konstruksi *Tanjungpinang*

- Recorded and monitored credit sales transactions made by contractors, construction workers, and regular customers.
- Controlled each customer's credit limit and payment due date.
- Prepared invoices and bills, and reconciled accounts receivable payments received by bank transfer or cash.
- Recorded invoices for incoming purchases from suppliers or distributors, including cement, steel, paint, and ceramic tiles.
- Matched delivery orders (SJ), purchase notes, and supplier invoices before scheduling payments.
- Scheduled accounts payable according to due dates to take advantage of early payment discounts.
- Managed petty cash for daily store operations, including vehicle fuel, refreshments for loading and unloading workers, and stationery purchases.
- Compiled daily cashier deposits from cash sales.
- Conducted periodic bank reconciliations against transaction records in the system and cash book.

EDUCATION

Bachelor's Degree (S1) – Information Systems

Sep 2024 – Sep 2027

Universitas Bina Nusantara

ORGANIZATIONS

Media Division Partner, ISG BINUS 2026

Jan 2025 – Present

ISACA Student Group (ISG)

- Covered events and photographed and recorded documentation during seminars on IT Audit/GRC, bootcamps, and company visits.
- Prepared summaries or brief press releases for news publication on the organization's official website or portal.
- Worked closely with the Head of Media and other divisions, including Program/Events and People, to align publication messaging and promotional needs for each organizational agenda.
- Developed media partnership plans and ensured publication commitments were fulfilled with media partners for ISG BINUS events.

SKILLS

Enterprise Resource Planning (ERP) & Business Operations	**Systems Analyst**
UI/UX Designer	**Professional & Soft Skills**

PROJECTS

Custom Phone Case & Accessories ERP System (Kostarika)

2026

System & ERP Analyst — Information Systems Project (ERP, System Analyst & Software Development)

- Developed a custom ERP system for a phone-case and accessories printing business to modernize production and distribution workflows.
- The system focuses on automating shipment tracking number management, integrating raw-material inventory records, and monitoring printing status in real time.
- The solution improved shipping accuracy, shortened order processing time (fulfilment time), and minimized the potential for shipping-label errors in store operations.

TheSpace (Smart Workspace & Cafe Rental Platform)

2025

System Analyst — ISPM (Information System Project Management)

- Designed the system architecture and redesigned manual workspace/office reservation processes, which required in-person visits, and cafe ordering by telephone into an integrated digital platform.
- Prepared system requirements specification (SRS) documentation and UML/BPMN diagrams for flexible rental periods (by the hour, day, week, month, or year) and a building-wide food delivery ordering system.
- Designed real-time room availability and occupancy tracking logic, along with payment gateway integration and transaction history tracking.
- Supported building operational efficiency (Smart Building concept) and minimized ordering errors (human error) through transaction workflow automation.

Mille Billiard Management & Reservation System

2024

System Analyst & Lead Developer — Project LEC ISAD

- Designed and developed a web/mobile-based rental and reservation management application to automate Mille Billiard's business operations and resolve conflicts in tracking playing time.
- Designed an online booking system with real-time table availability checks to eliminate walk-in queues and the risk of customers going elsewhere.
- Built an integrated automated billing timer that calculates table rental duration accurately, reducing the potential for duration disputes to 0% and increasing payment transparency.
- Provided a digital complaint and customer feedback module in the application to make complaint handling more structured without disrupting the playing experience.
